

Description

Pneumatic plug valve includes 3-way, four way plug valve, which is applicable to change the media flowing direction or to distribute the media. Widely used in industries such as petroleum, chemical industry, pharmacy, chemical fertilizer, power, industry etc.

Nominal Pressure: class 150lb~900lb, PN1.0~16.0

Working temperature : -29 °C~550 °C.

Structure Feature :

1. The product has reasonable structure, reliable sealing, excellent performance and beautiful appearance.
2. According to different conditions, the 3 way, 4 way plug valve can be designed into multiple media flowing forms (eg. "L" type or "T" type) or all kinds of material (eg. Iron, cast steel , stainless steel) or sealing type (eg. Metal to metal , sleeve type , lubricated type etc.)
3. The materials of parts and sizes of flanges can be reasonably configured according the actual operating condition of the requirements of the customers, so as to meet various needs of engineering.
4. Driving manner: Wrench, Worm, Worm gear pneumatic, electric- actuated.
